Effective Discount: Measuring Overall Network Value

From size of the network to utilization rates to money saved, there are multiple ways to measure the overall value of a provider network. The effective discount – which represents savings on all claims both in and out of the network – encompasses a number of individual measures. Accordingly, it is a good overall measure of the value of a provider network.

According to a recent study, our Delta Dental PPO℠ Plan delivers the industry’s best effective discount – averaging 25.3 percent nationally – resulting in more than $5.9 billion in annual savings compared to dentists’ average FAIR Health submitted charges.

About the Study
The independent study examined a full year’s worth of claims data from Delta Dental and 17 other companies offering dental coverage. FAIR Health data was utilized to establish a universal baseline for average dental industry charges – consistent across all companies, geographies and procedures.

How Delta Dental Delivers the Best Effective Discount

1. Large Network Size
   Delta Dental is able to offer savings even to those enrollees who choose to visit a non-PPO dentist – a key benefit of our exclusive Delta Dental Premier network, the largest nationwide with more than 148,000 unique dentists.¹

2. High Network Utilization
   Delta Dental delivers a national network utilization rate of more than 94 percent for its combined PPO and Premier networks, compared to an average PPO utilization of 63 percent for competitor networks.² More in-network visits equal more savings.

3. Direct Network Approach
   Local staff members foster strong relationships directly with dentists – establishing fair reimbursement rates and maintaining network stability.

Count On Delta Dental
As America’s leading dental coverage provider, we serve more than 75 million people and provide coverage to over 139,000 groups nationwide.
